Models Compatible with Collaboration have been added.

The flat hollow-shaft AC servo motor HMA series has become compatible with the latest servo amplifier MINAS A6 series manufactured by Panasonic Corporation and has become capable of controlling from various types of network.

Compatibility with RTEX, EtherCAT and general communication (serial, analog I/O, Modbus) integrates the user interface, and the hollow shaft mechanism contributes to reduction in size of the device configuration.

Contact: AC servo motor PMA series (Harmonic Drive Systems Inc.)
AC servo amplifier MINAS A6 (Panasonic Corporation)

Features

- The hollow shaft design provides the piping/wiring being layout on center of rotation without offsetting the motor. (The hollow shaft is selectable from $\phi 16$ to 60 mm.)
- The flat structure reduces the size of the device configuration.
- A wide variety of five sizes with the rated output from 163 to 1320W has been added to the lineup.
- Integrated brake option is available without dimension change.
- Provides easy connection to a system configured with RTEX, EtherCAT and general communication.

Simple system configuration
